

NITRATE REMOVER

PRODUCT DATA SHEET

Nitrate Remover is a premium grade nitrate selective ion exchange resin. Removes Nitrates & Nitrites whilst working in a wide pH and temperature range. It is highly resistant to organic fouling.

APPLICATION

Nitrate Remover contains 3 round pods that fit directly into your internal/external filter, in the chemical section. Follow instructions on how many pods to use according to your tank size.

When used in conjunction with our Ammonia Block pod, place the Ammonia Block pod first, then the Nitrate Remover pod.

Rinse before use. Simply discard after use.

We advise to test your nitrate levels prior to use.
